Project Overview

Project: LearnEase – Online Learning Platform

Submitted by: Sujal Kumar Singh

Intenship Domain: UI/UX Design

Task: Task 4 – Interactive Prototyping

Design Tool: Figma

Introduction to LearnEase

LearnEase is an online learning platform designed to help students discover, explore, and enroll in high-quality courses across diverse domains. The platform provides a seamless experience from browsing courses to accessing detailed course information.

Objective of Task 4

The objective of Task 4 is to design and develop an interactive prototype that connects all key screens and demonstrates the complete user journey.

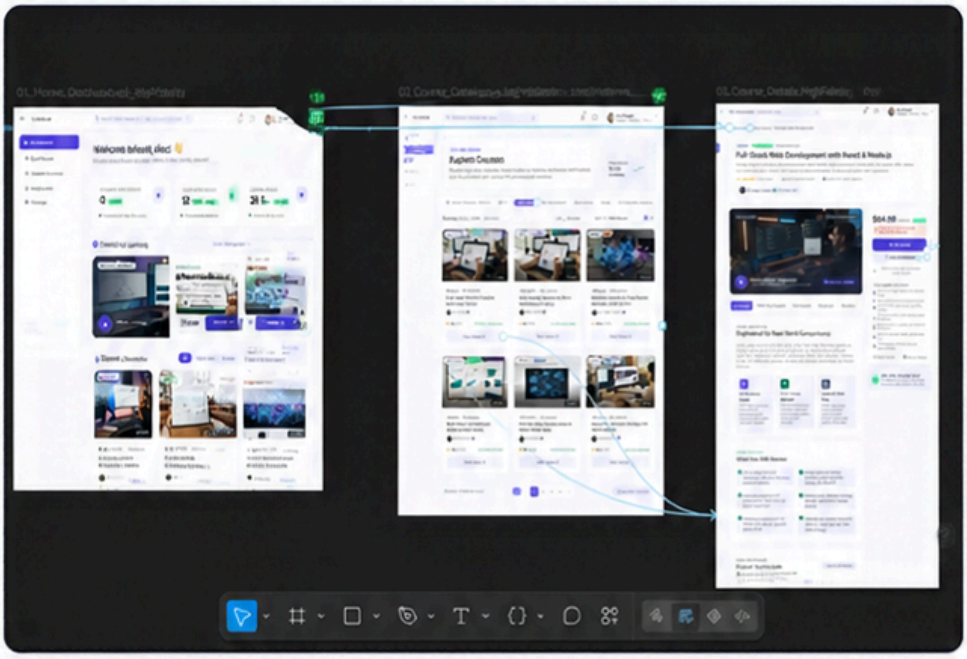

Purpose of Interactive prototyping

Interactive prototyping helps visualize navigation, user flow, and screen transitions before development. It ensures a smooth and intuitive learning experience by validating the flow and structure of the platform.

Overview of the three main screens

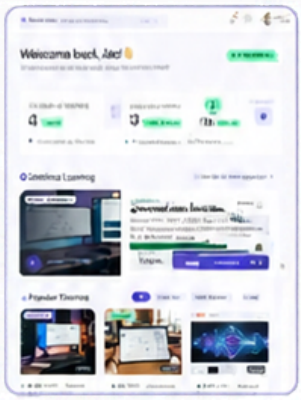

The prototype includes three primary screens: Via Home Dashboard, the Explore Screen, catalogue, and Content Details page. These screens are connected to showcase the end-to-end user journey.

Complete Figma Prototype (High-Fidelity) with Connections

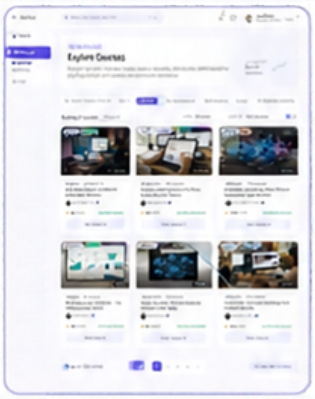

In this task, high-fidelity screens were connected in Figma to demonstrate the user journey through clickable interactions.

Prototype Interactions and User Flow

OVERVIEW

This section outlines the key user flows and interactions designed and prototyped for LearnEase.
The prototype was tested using **Figma Present mode** to validate navigation and screen transitions.

USER FLOW DIAGRAM

RETURN PATH

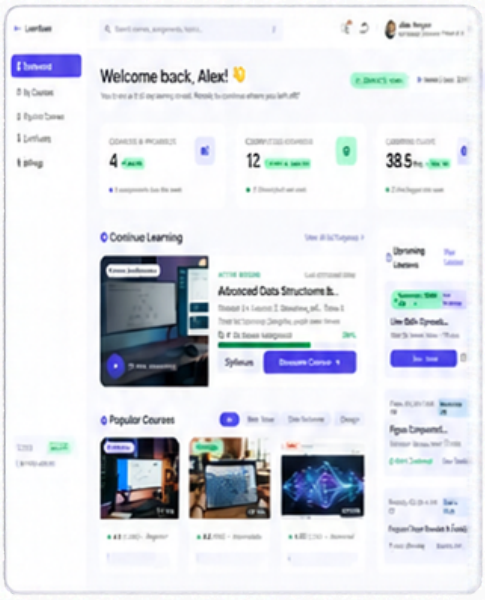

Course Details → Course Catalogue → Home Dashboard

KEY INTERACTIONS

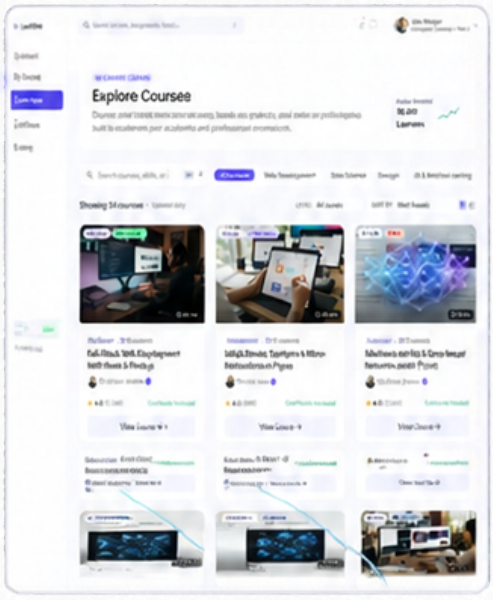

1. **Home Dashboard → Course Catalogue**
   Navigate to the Home Dashboard to the Course Catalogue by clicking **Explore Courses.**
2. **Home Dashboard → Course Details**
   Navigate to the Home Dashboard to the Course Details page by clicking **Continue > Resume Learning.**
3. **Course Catalogue → Course Details**
   Navigate to the Course Catalogue to Course Details by selecting a course card or clicking
4. **Course Details → Course Catalogue**
   Return from the Course Details page to the Course Catalogue by clicking **Back to Courses.**
5. **Navigation to other screens back to Home Dashboard**
   Users can return to the Home Dashboard using the **Dashboard** option in the left navigation.

Results and Conclusion

Final outcomes of the interactive prototype and evaluation of the user journey.

Tools Used

- Figma
- Interactive Prototyping
- UI/UX Design

Key Outcomes

- Connected three high-fidelity screens
- Created clickable navigation interactions
- Demonstrated the main user journey
- Tested navigation in Present mode

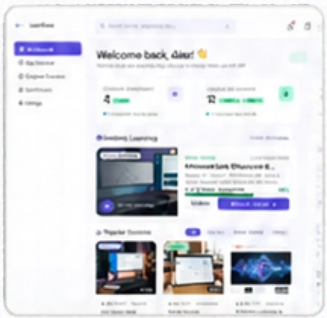

Conclusion

The interactive prototype demonstrates the navigation structure and user experience of LearnEase. It provides a clickable representation of the platform's core journey, connecting the Home Dashboard, Explore Courses, and Course Details screens. This prototype is intended for design and evaluation purposes and is not a fully developed functional application.
